

Employee Salaries ★

[Problem](#)[Submissions](#)[Leaderboard](#)[Discussions](#)

Write a query that prints a list of employee names (i.e.: the name attribute) for employees in **Employee** having a salary greater than \$2000 per month who have been employees for less than **10** months. Sort your result by ascending employee_id.

Input Format

The **Employee** table containing employee data for a company is described as follows:

Column	Type
employee_id	Integer
name	String
months	Integer
salary	Integer

where employee_id is an employee's ID number, name is their name, months is the total number of months they've been working for the company, and salary is the their monthly salary.

Sample Input

employee_id	name	months	salary
12228	Rose	15	1968
33645	Angela	1	3443
45692	Frank	17	1608
56118	Patrick	7	1345
59725	Lisa	11	2330
74197	Kimberly	16	4372
78454	Bonnie	8	1771
83565	Michael	6	2017
98607	Todd	5	3396
99989	Joe	9	3573

Sample Output

Angela
Michael
Todd
Joe

Explanation

Angela has been an employee for **1** month and earns **\$3443** per month.

Michael has been an employee for **6** months and earns **\$2017** per month.

Todd has been an employee for **5** months and earns **\$3396** per month.

Joe has been an employee for **9** months and earns **\$3573** per month.

We order our output by ascending employee_id.
